### 6 reasons to choose the secret, inexpensive way to get your perfect smile

Have you spent years feeling self-conscious or embarrassed about damaged, stained or misshapen teeth?

A dentist could probably put this right for you.

But you worry that it might be expensive or take a long time.

It's easy to see why. For example...

Porcelain veneers can give you a great-looking smile. But they can be costly, treatment takes several weeks and it may be necessary for some healthy tooth structure to be removed.

Well here's some good news for you:

**Now you can feel confident about your smile with a relatively inexpensive, easy, safe, quick treatment that most people have never heard of.**

At Harley Street we use **cosmetic dental bonding** to give you your perfect smile - usually in **one single treatment appointment**.

HARLEY STREET

DENTAL STUDIO

We use “composite resin” (the same material as white fillings) to very simply repair your teeth.

## Natural-looking smile

Your dentist carefully chooses a resin to match the colour of your teeth.

Then they mould and shape it to cover up your imperfections - giving you your perfect, natural-looking smile.

Dental composite bonding can be used to restore chipped, cracked, decayed or discoloured teeth.

It can also be used to close gaps and make teeth look longer.

Keep reading to find out how it works.

But first, here are **6 reasons why you should choose dental bonding:**

1. You can stop feeling self-conscious and start to feel confident about your smile.
2. It's one of the least expensive cosmetic dental treatments.
3. It's also one of the quickest as treatment can often be completed in a single session.
4. Treatment is simple and pain free as there is no need for drilling or injections.
5. Natural looking results means that no-one needs to know you have had treatment.
6. The procedure is usually completely reversible as no damage is caused to your natural tooth material.

## How does it work?

Your dentist very lightly roughens the area of the tooth to be treated...

... coats it with a conditioning liquid...

... applies the bonding material in thin layers...

... uses a bright light to harden the material...

... and gives it a polish for a smooth and natural finish.

## Why Harley Street Dental Studio?

Lots of our patients have thanked us for boosting their confidence.

They say they no longer try to hide their teeth in social situations. Instead they now show off their smiles.

## Happy patients

Our senior cosmetic dentists each have over 20 years experience.

Many of our happy patients have been with Harley Street for years.

You're in safe hands.
